CUTUBKA 1AAD · CASHARKA 3AAD EE 5-TA CASHAR

Ilaha iyo Qaababka Xogta

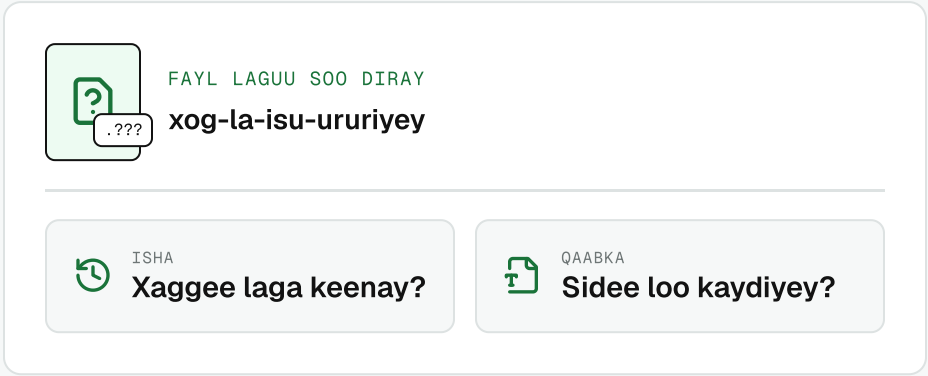

DHAMMAADKA CASHARKAN

Waxaad awoodi doontaa inaad garato halka xogta la isu ururiyey (dataset) laga keenay, qaabka (format) loo kaydiyey, iyo inay tahay xog si toos ah loo ururiyey (primary data) ama xog hore loo ururiyey (secondary data).

Dulmar

Qof aad wada shaqaysaan ayaa kuu soo diray fayl ay ku jirto xog la isu ururiyey (dataset). Ka hor intaadan isticmaalin, waxaad u baahan tahay inaad ogaato halka xogta laga keenay, in isha lagu kalsoonaan karo, iyo sida faylka loo furayo.

Arrimahaas waxaa go'aamiya isha xogta (data source) iyo qaabka xogta (data format).

Ilaha Caamka ah ee Xogta (Common Data Sources)

Isha xogta (data source) waa halka ay xogtu asal ahaan ka timid. Xogta waxaa loo ururin karaa habab kala duwan:

Xog-gelin gacanta ah (manual entry)

Nidaamyada ganacsiga

Website-yada iyo apps-ka

Sensors-ka iyo devices-ka

Sahanno (surveys)

Xogta dadweynaha (public datasets)

Isha xogtu waxay saamaysaa **tayada xogta (data quality)**. Xog laga helay nidaam ganacsi la isku halayn karo badanaa way ka nidaamsan tahay xog gacanta lagu geliyey jadwal (spreadsheet).

Xog Si Toos ah iyo Xog Hore loo Ururiyey

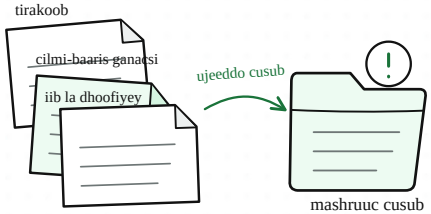

Xog si toos ah loo ururiyey

Xog si toos ah loo ururiyey (primary data) waa xog si toos ah loogu ururiyey ujeeddo gaar ah. Tusaale ahaan, milkiile dukaan ayaa buug ku qora iibka maalin kasta, ama iskuul ayaa sameeya sahamin u gaar ah.

Xog hore loo ururiyey

Xog hore loo ururiyey (secondary data) waa xog uu qof kale hore u ururiyey, loona isticmaalayo ujeeddo cusub. Tusaalooyinka waxaa ka mid ah warbixinnada tirakoobka dadweynaha, cilmi-baaris ganacsi, ama xog iib laga soo saaray waax kale.

Xogta si toos ah loo ururiyey badanaa waxay si dhow ula xiriirtaa su'aashaada. Xogta hore loo ururiyey waxay kuu badbaadin kartaa waqti, laakiin waa inaad hubisaa inay ku habboon tahay baahidaada iyo in isheeda lagu kalsoonaan karo.

Qaababka Xogta (Data Formats)

Qaabka xogta (data format) waa sida xogta loo kaydiyo ama loo wadaago.

QAABKA	ISTICMAALKA CAADIGA AH
`CSV`	Xog leh safaf iyo tiirar, kuna kaydsan fayl qoraal ah
`Excel (.xlsx)`	Jadwal leh qaacidooyin (formulas) iyo habayn (formatting)
`JSON`	Xog ay websites iyo apps is dhaafsadaan
`SQL databases`	Xog ganacsi oo habaysan, laguna kaydiyo miisas
`PDF / Word`	Warbixinno iyo dukumiintiyo; badanaa way adag tahay in tirooyinka si toos ah looga soo saaro

Bilowga, waxaad inta badan arki doontaa jadwallada (spreadsheets), faylal CSV ah, iyo miisaska database-ka.

Muhiimadda Isha iyo Qaabka Xogta

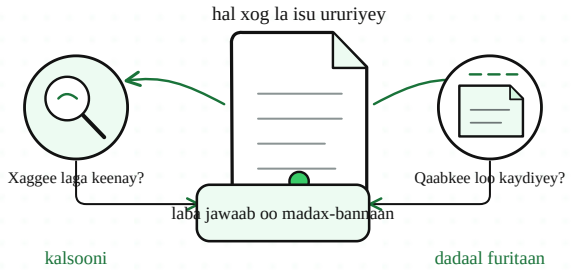

Ka hor intaadan xog la isu ururiyey (dataset) isticmaalin, iska weydii laba su'aalood:

Xaggee laga keenay?

Jawaabtu waxay kaa caawinaysaa inaad ogaato in isha lagu kalsoonaan karo.

Qaabkee loo kaydiyey?

Jawaabtu waxay kuu sheegaysaa sida loo furi karo iyo inta shaqo ee loo baahan yahay.

Il la isku halayn karo mar walba ma laha qaab fudud, qaab fududna mar walba ma xambaarsana xog tayo leh. Labadan su'aalood way kala madax-bannaan yihiin, waana sababta ay muhiim u tahay inaad labadaba isweydiiso.

TUSAALOOYIN

Xogta iibka ee ku jirta database-ka shirkadda waxay ka iman kartaa il la isku halayn karo, waxayna yeelan kartaa qaab fudud

Warbixin PDF ah waa lagu kalsoonaan karaa, laakiin tirooyinka ka soo saaristoodu waqti ayay qaadan kartaa

Jawaabaha sahanku waxay ku jiri karaan jadwal nadiif ah, haddana waxaa ka maqnaan kara jawaabo
