CUTUBKA 2AAD · CASHARKA 2AAD EE 7-DA CASHAR

Data Analysis iyo Business Intelligence

DHAMMAADKA CASHARKAN

Waxaad awoodi doontaa inaad sharaxdo waxa ay kala yihiin Data Analysis iyo Business Intelligence (BI), waxa uu mid walba qabto, iyo meelaha ay wadaagaan.

Dulmar

Milkiile dukaan ayaa ogaaday in hal alaab toddobaad kasta dukaanka ka dhammaado, halka alaab kale ay khaanadda iska taallo. Wuxuu rabaa inuu ogaado sababta, sidoo kalena wuxuu doonayaa hab fudud oo uu bil kasta iibka ugu hubiyo isaga oo aan mar kasta faylal badan baarin.

Halkaas ayay ka soo galaan **Data Analysis** iyo **Business Intelligence (BI)**. Labaduba waxay xogta u adeegsadaan inay dadka ka caawiyaan fahamka xaaladda iyo go'aan qaadashada, gaar ahaan ganacsiga.

Waa maxay Data Analysis?

Data Analysis waa habka xogta loo baaro, loo nadiifiyo, qaabkeeda loo beddelo, loona fasiro si looga helo macluumaad faa'iido leh oo lagu gaari karo go'aan.

FALANQEEYE XOG (DATA ANALYST) WUXUU QABAN KARAA SHAQOOYIN AY KA MID YIHIIN

- ✓ Inuu baaro isbeddellada iibka
- ✓ Inuu ogaado sababta macaamiishu u joojiyaan isticmaalka adeegga
- ✓ Inuu maamulayaasha u diyaariyo warbixinno

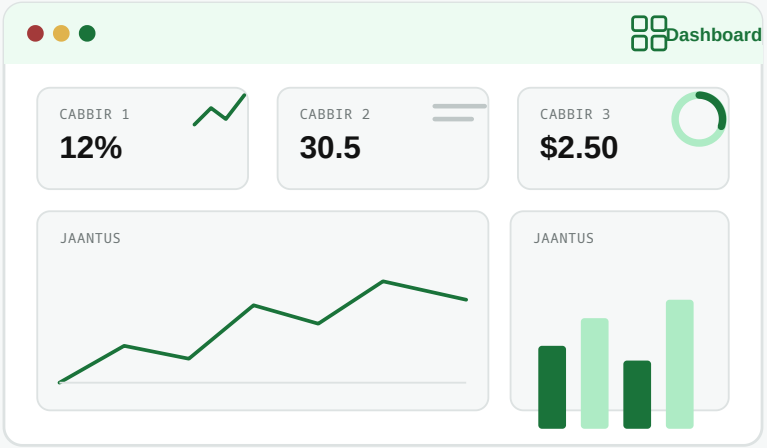

FALANQAYNTA XOGTU BADANAA WAXAY KA JAWAABTAA SU'AALO AY KA MID YIHIIN

- ? Alaabtee ayaa ugu iib badnayd?
- ? Muxuu dakhliga bishii Maarso hoos ugu dhacay?
- ? Xaruuntee ayaa faa'iidada ugu badan keenta?

Waa maxay Business Intelligence (BI)?

Business Intelligence (BI) wuxuu diiradda saaraa in xogta loo beddelo dashboards, warbixinno, iyo cabbirro (metrics) ka caawiya hay'adaha ama shirkadaha inay la socdaan waxqabadka oo ay go'aanno gaaraan.

Dashboard waa shaashad kooban oo muujisa cabbirro iyo jaantusyo muhiim ah.

BI wuxuu badanaa xoogga saaraa:

KPI (key performance indicator): cabbir lagu ogaado horumarka laga gaaray yool

Dashboards xogta siyaabo kala duwan loogu eegi karo

Warbixinno joogto ah

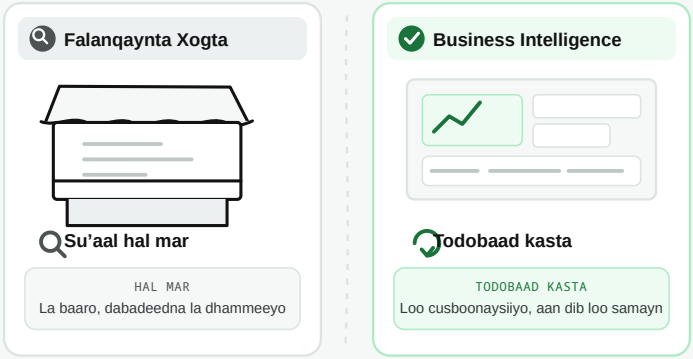

Faham muhiim ah oo kooxaha ganacsigu si fudud u heli karaan

Power BI iyo Tableau waa qalab inta badan lagu isticmaalo BI.

Sidee ayay Isugu Xirmaan?

DA iyo BI qaybo badan ayay wadaagaan.

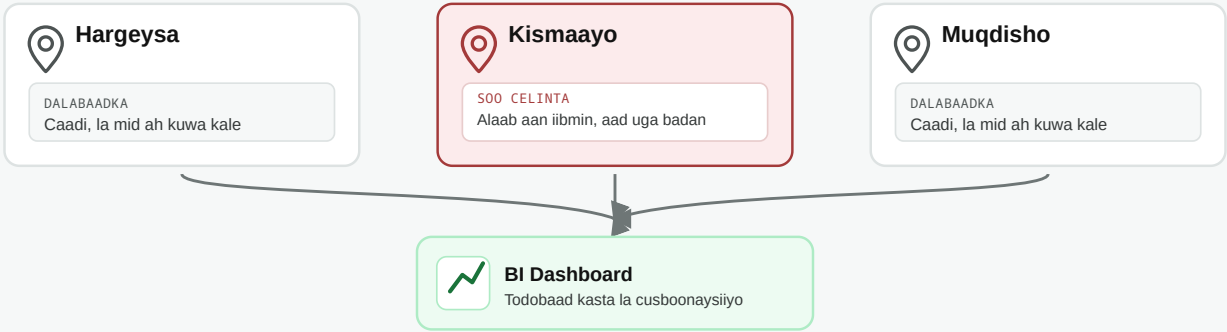

DATA ANALYSIS	BUSINESS INTELLIGENCE
Waa shaqada ballaaran ee xogta lagu baaro laguna fahmo	Waa dhinaca ganacsiga ee warbixinta iyo la socodka xoogga saarta
Badanaa waxay ka jawaabtaa su'aal gaar ah oo hal mar la baaro	Badanaa waxay si joogto ah ula socotaa su'aal soo noqnoqota

Farqiga ugu muuqda waa inta jeer ee shaqada la qabto. Falanqaynta xogtu badanaa waxay ka jawaabtaa su'aal hal mar la weydiiyey. BI wuxuu diyaariyaa hab jawaabta su'aashaas toddobaad kasta loo cusboonaysiiyo, iyada oo aan qofku shaqada oo dhan dib u samayn.

Tusaale

Ganacsade jumlo iibiya oo alaab siiya dukaamo ku yaal Hargeysa, Kismaayo, iyo Muqdisho. Wuxuu rabaa inuu ogaado sida ganacsigu uga socdo magaalo kasta.

- **Falanqeeye xog (data analyst)** ayaa baaraya dalabaadkii lixdii bilood ee la soo dhaafay. Wuxuu ogaaday in dukaamada Kismaayo ay dalbadaan tiro la mid ah kuwa kale, laakiin ay soo celiyaan alaab aan iibmin oo aad uga badan
- **BI dashboard** ayaa toddobaad kasta muujinaya dalabaadka, alaabta la soo celiyey, iyo alaabta ugu iibka badan magaalo kasta. Sidaas ayuu maamuluhu bisha xigta xogta cusub u arki karaa isaga oo aan qof weydiin

Falanqeeyuhu wuxuu ka jawaabay su'aal gaar ah. Dashboard-kuna wuxuu hubiyey inaan loo baahnayn in su'aashaas mar kasta dib la isku weydiiyo.
